COACHING TIPS

FIRST TOUCH

The world's best players are always one step ahead of the game. *FIFA 10* gives you total freedom to decide how to control the ball and where to direct it before it even reaches you.

The strength of your first touch should depend on the proximity of your marker and the amount of space around you. If you're being closely marked and the pitch is congested, quickly press the right analog stick in the direction you want to send the ball in order to get it out from under your feet, while ensuring you retain possession. Alternatively, if you have acres to run into, move and hold the right analog stick towards the space and set off after it, leaving your marker standing.

PUSHING YOUR MARKER

Pushing your marker by moving the right analog stick is a good way to keep him at arm's length while shielding the ball (press and hold the R1 button). However don't overdo it—getting overly physical with your opponent could draw the unwanted attentions of the referee!

SETTING UP THE GAME

USER PROFILE

Before heading out onto the pitch, you must create a profile to track your stats and results in *FIFA 10*. To do so, when you first start the game enter your name, select your favorite team, enable/disable Casual Controls, select a controller configuration, and decide if you want to use Autosave.

NOTE: If you choose to use Casual Controls, your controller configuration is set for you and Autosave is turned on automatically.

NOTE: If your television supports Progressive Scan, activate Progressive Scan mode by pressing the △ button and the ✕ button at the same time on the language select screen. After confirming the settings, loading continues as usual.

NOTE: Activating Progressive Scan on the language select screen boots the game in the currently selected language. It is recommended that you highlight the desired language before activating Progressive Scan.

NOTE: *FIFA 10* has one save file for user profiles, which holds up to eight different profiles. Overwriting this file automatically deletes all previously-saved user profiles. If you have a memory card (8MB) (for PlayStation®2) containing previously-saved profiles, ensure it is inserted prior to launching *FIFA 10* to prevent any risk of overwriting the saved data (the game prompts you prior to attempting to overwrite saved files on the memory card (8MB) (for PlayStation®2)). Please use the Profile Manager in My FIFA 10 to manage all your existing profiles.

NEW LEGENDARY DIFFICULTY

If you think that you're the best of the best, then *FIFA 10* is ready to put you and your skills to the test. Go to Game Settings in the MY FIFA 10 menu and change the difficulty setting to Legendary. Good luck!

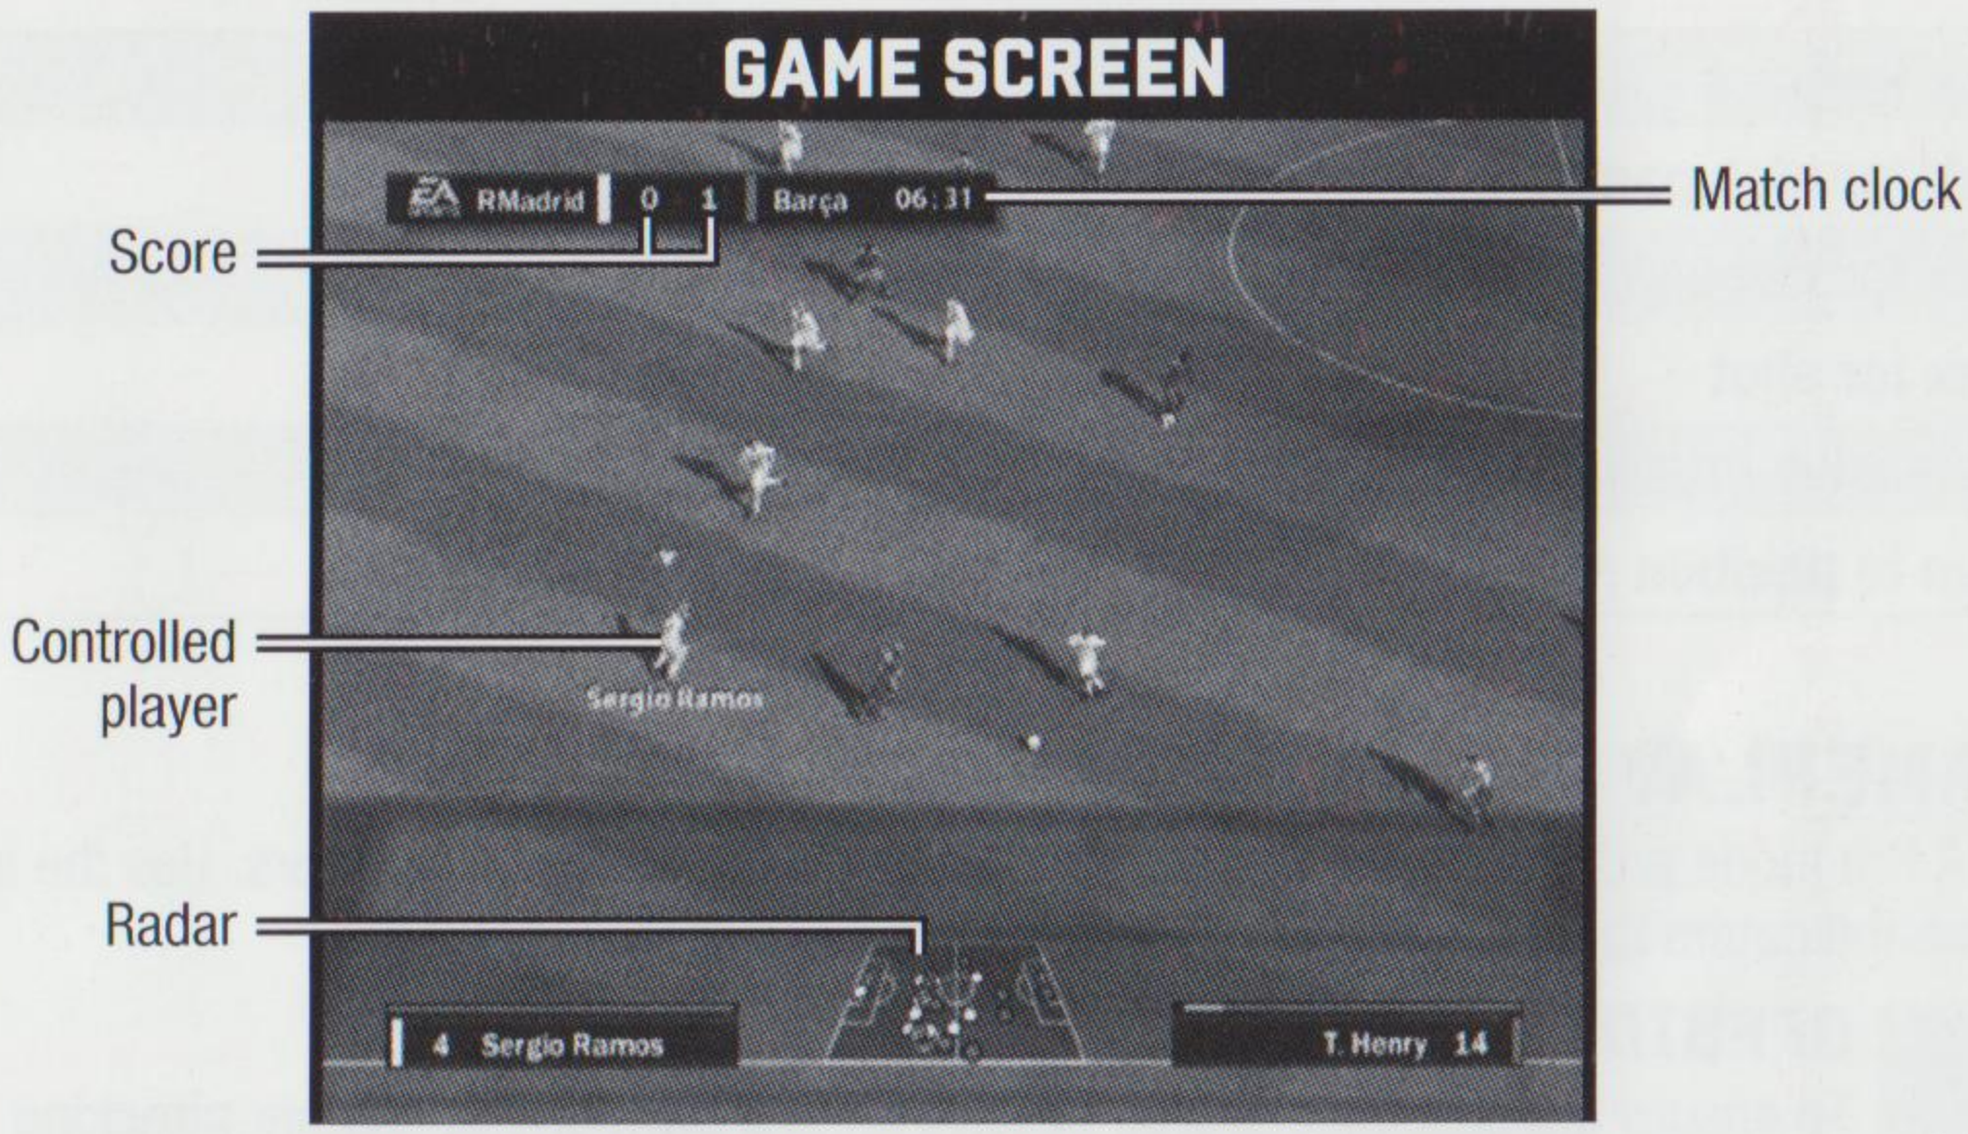
NEW SCOUTING REPORT

Before every match against the CPU, view the Scouting Report. This report identifies a key player, explains the team's formation, and even tells you about their style of play. Use the Scouting Report to discover the tactics the opposing team uses during games, and adjust your style of play accordingly.

PLAYING THE GAME

KICK-OFF

Press the **START** button in the main menu to get straight out onto the pitch with your default settings. If you'd like to play a different mode, select KICK OFF, and then pick TEAM or BE A PRO.



SAVING AND LOADING

Before exiting a game mode or a menu where changes have been made, make sure you save your progress to a memory card. All unsaved information is lost otherwise. Load files manually by accessing the load screen (via the main menu).

GAME MODES

NEW BE A PRO: CLUB AND COUNTRY

Be A Pro: Club and Country is your chance to become a national hero. Participate in league, cup, and continental competitions, vie for a place in your country's national team, and even try to make it to the 2010 FIFA World Cup™.

It takes time for a player to grow from rookie to superstar, and Be A Pro: Club and Country lets you take control of that path. Select a team, create a player, and guide him to greatness.

Complete challenges in each match to help your player grow his attributes and follow all the action with the player-focused 3rd Person Cam.

NOTE: Before taking the pitch, every player must either create a new player or choose an existing one in order to track game stats and player development. Choosing an established player may give you a head start in terms of task completion but a created player develops more quickly.

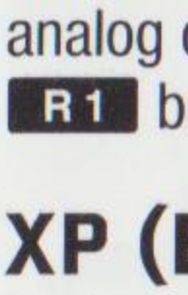
BE A PRO CONTROLS

If you're going to play as a pro, you've got to think like one. When your team is on the attack, time your runs and call for the ball at the right time and when defending, ensure you cover any dangers posed by your opponents. Teamwork is everything in soccer and communication with your teammates is the key to success. Wherever you are on the field, make sure you use the following commands to increase your chances of victory. If you are not using Classic Analog Dribble, these controls may change.

Ask for pass	⊗ button
Ask for high pass/cross	□ button
Ask for through ball	△ button
Ask for shot	○ button
Defensive Pressure (when defending)	⊗ button
Run to position (when defending)	L2 button (hold)

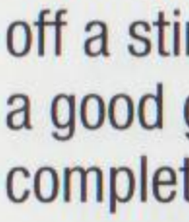
GAMEPLAY INDICATORS

Be A Pro mode provides many of the same challenges faced by real players. Use the in-game indicators to make sure you're in the right place at the right time.



OFFSIDE

To ensure the assistant referee doesn't bring a swift end to another attacking move, make sure you keep an eye out for his flag. When you stray offside, a flag icon appears. To avoid being pulled up (and losing valuable XP), run back past the last defender to get into an onside position.



THREAT INDICATORS

For help with marking players, turn threat indicators ON in the Visual Game Settings screen (accessed via the pause menu or the Be A Pro: Club and Country Central screen). Players you should be picking up are highlighted by exclamation marks. Make sure you track them!

FATIGUE

Make sure your player lasts the 90 minutes! If you run around the pitch non-stop, the analog controller (DUALSHOCK®2) vibrates, indicating that he needs a rest. Release the R1 button and let him slow down to replenish his energy.

XP (EXPERIENCE POINTS)

During a match your every move is rated, whether you're caught out of position, or pull off a stinging shot. At the end, your overall performance is calculated and, if you've had a good game, you're awarded XP in the Match Results screen (you gain extra XP by completing player and team tasks set before the game).

ATTRIBUTE POINTS

Every time your player earns enough XP to level up, you are granted Attribute Points to use on increasing his abilities. Press the **START** button in the Match Results screen or select PLAYER MANAGEMENT in the Be A Pro: Club and Country Central screen to spend these points.

OTHER GAME MODES

NEW TEAM STYLES

Every team has a different way to approach the game. Team Styles gives you the chance to create a custom style for your team of choice, putting your indelible stamp on a classic club. Fine-tune formations, attacking and defensive tactics, and styles of attack before gameplay begins, and experiment with a classic team in a new way. If you so choose, completely disable the Team Styles feature.

NEW THE SEASON

New in *FIFA 10* is The Season. For the first time, you take control of a football club and play through a full season campaign without worrying about anything but playing the game. Managing finances, transfers, and training your team is for someone else to handle- you simply need to get on the pitch. Pick it up and play away.

MANAGER MODE

Get even deeper into team management as you arrange pre-season friendlies, assign mid-week team training sessions, develop your youth players, and try to meet the demands of your board.

PSP™ (PlayStation®Portable) SYSTEM LINK

Transfer your Manager files to a PSP™ (PlayStation®Portable) system and play games on the go. A USB cable is required to connect your PlayStation®2 console to your PSP™ system, and you must also have a copy of *FIFA 10* for the PSP™ system.

To transfer files to/from a PlayStation®2 console:

- Select SAVE / PSP™ system LINK in Manager Mode Central then select EXPORT VIA PSP™ system LINK to export your career to the PSP™ system.
- Select PSP™ system LINK from the New/Load Manager menu to import your career from the PSP™ system.

  NOTE: Refer to the *FIFA 10* PSP™ system game manual for instructions on setting up the PSP™ system for file transfers.

TEAM MANAGEMENT

CREATE FORMATIONS

Create custom formations for individual opponents by selecting CREATE FORMATIONS in the Team Management screen and follow these steps:

1. Select an empty slot, then a formation to use as your base.
2. Select the position you want to customize. The grey box shows what area of the pitch it covers (if boxes overlap, that area is well-covered).
3. Move the icon for the selected position with the left analog stick. If you move it outside the grey box you are prompted to re-label the position (press the △ button to reset it).

   NOTE: The position icon's color changes according to which third of the pitch it's in—red for strikers, blue for midfielders, green for defenders, and orange for goalkeepers.
4. Decide where each player in your team runs during attacks by selecting a position and using the left analog stick to choose a direction. Assign up to two directions to each position.
5. Assign defensive runs in the same way as attacking runs.
6. Once you're happy with your formation, press the **START** button to name it and assign it to any team in the game.

   NOTE: Custom formations are saved automatically if the Autosave feature is turned on. Otherwise, you are prompted to save upon exiting.

HINTS AND TIPS

NOTE: To see more hints in-game select MY FIFA 10 > TIPS & HINTS.

TRICKS WHILE SHIELDING

When you have control of a skillful player, try the Scoop Turn or Rainbow Flick while faking a shield (R1 button) to leave your marker for dead.

BE THE KEEPER

Don't sit back and let the keeper do all the work—click the R3 button in open play or during a set piece to take control of your goalie. When the opposition is bearing down on goal, close down the angle by charging out and making a goal-stopping save.
